SUMMARY KEYWORDS

presentation, selling, vendors, election, vulnerabilities, counties, county, jared, dominion, hear, people, citizens, source, admitted, atlantic council, strangers, system, aware, steve, video

SPEAKERS

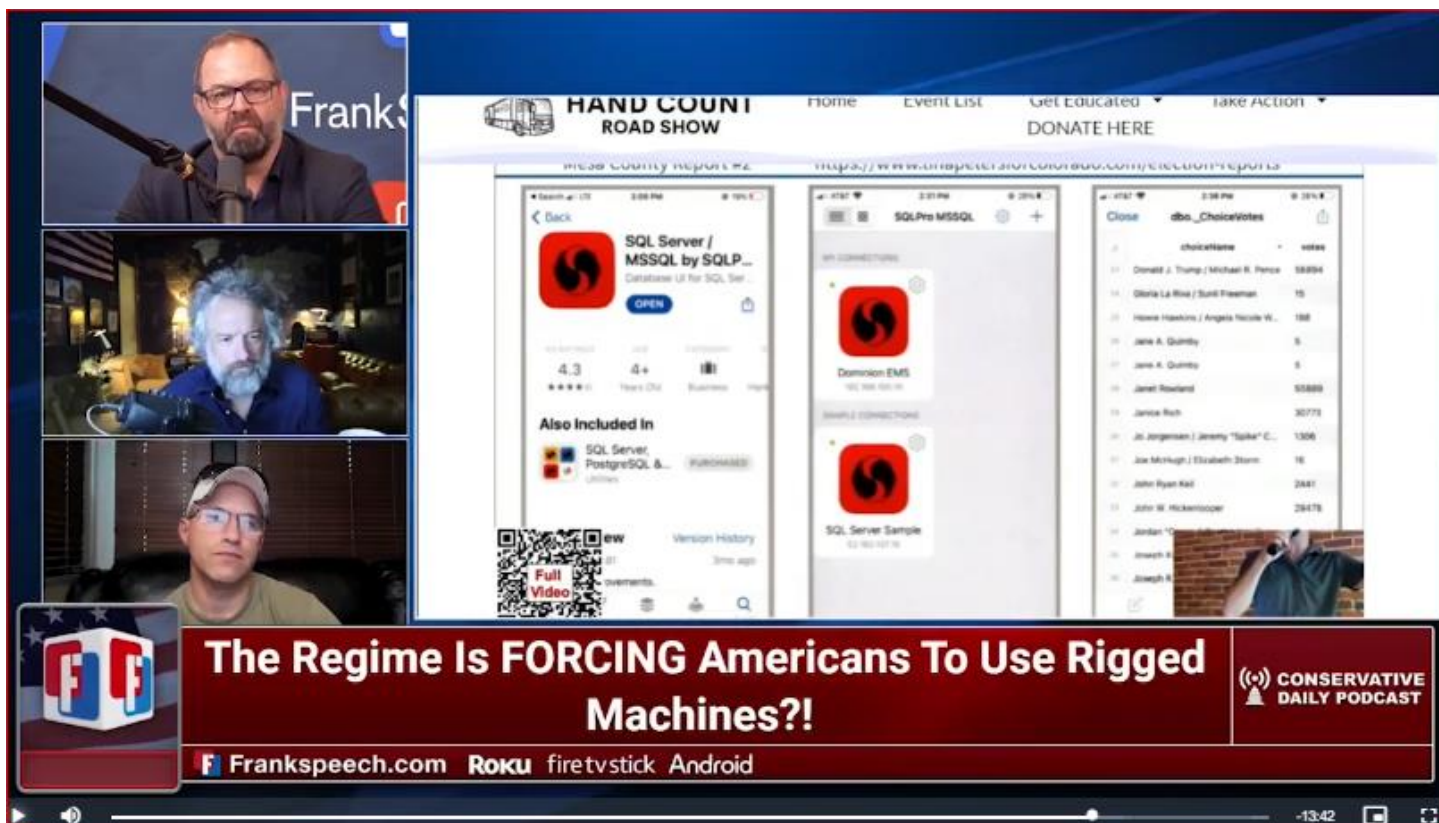

Joe Oltmann_Conservative-Daily.com, Mark Cook_CO-IT-Guy, David Clements_Prof.

Mark Cook_CO-IT-Guy 01:14:20

I keep going. And Barry [County] is Sheriff Leaf's County, by the way, yeah,

Joe Oltmann_Conservative-Daily.com 01:14:25

By the way, the protected emails and discovery inside the case with with Patrick Byrne, you heard about this, and the judge has done everything took Stephanie Lambert off the case. I mean, it's like, it's not just a miscarriage of justice, it's literally illegal what they're doing.

Mark Cook_CO-IT-Guy 01:14:43

I'm running www.handcountroadshow.org is my site. What I do is I go around and I present to the citizens in the local counties to educate them about different things, and so they understand what the ecosystem is, what the problems with it are, the vulnerabilities, the evidence that lines up to the vulnerabilities, and then short and long term mitigation strategies for the counties. So I did a presentation in Barry County, and there are a couple strangers in the back of the room, and those strangers ended up being two representatives, **the President and the Vice President of Election Source, which is the vendor that provides all the Dominion work throughout the state of Michigan.** So here's the video. I just took a clip out of my big, long presentation of just the area where these guys really highlighted themselves.

Mark Cook_CO-IT-Guy 01:15:31

And so if there's this kind of **vulnerabilities in this system**, and they're telling us that these don't exist, that **our system can't flip votes from one candidate to another when clearly they have two backdoor utilities that actually allow that.** I don't trust their abilities. They they are either the worst people at their job ever, or their **total liars**, either way, which other of that is or whichever combination of it for a system that's critical infrastructure, **I'm not going to use it. I would never use this product.**

Mark Cook_CO-IT-Guy 01:16:09

Oh no, there's more. There's more. This is where it gets good. Put it all the way up. So I'll just say at this point, one of the county citizens noticed that two strangers in the back of the room, or from **Election Source.** And there's **Election Source** own website.

Joe Oltmann_Conservative-Daily.com 01:16:25

What happened to the video? Stop. Let's go.

Mark Cook_CO-IT-Guy 01:16:29

It's going. It's going. And so there's there's their information now. Steve provided his card. Jared, I had to look up to find out who they were. I want to watch the video, though. Why are we not playing the video? It is video. It's playing. So Jared kept raising his hand during most of the presentation, and then, of course, he kept standing up, and then Steve sat there and just recorded me during this.

But listen to what they say. And this is, you know, citizen has some questions. I had some questions. And then they admitted that they're aware of the back doors and dominion that they continue to sell dominion to the counties despite knowing that there were back doors. So you'll hear him say that, I just wanted to make sure you could pick it up, because you hear him in the background, but you can't see him. Yes,

A citizen then had some questions, I had some questions, then Gerrid Uzarski (COO) of ElectionSource admitted to two things with his CEO Steve DeLongchamp sitting right next to him in front of a room full of citizens:

1. They were aware of the back doors in Dominion.
2. They continued to sell Dominion to the Counties.

The Regime Is FORCING Americans To Use Rigged Machines?!

Mark Cook_CO-IT-Guy 01:17:16

Are you guys from Election Source? Yes. Oh, okay, well, what you should have said that we could have had a good conversation.

Conclusions
While the 4.14.A.1 build of the Democracy Voting System proved to mitigate four previously enumerated vulnerabilities, multiple medium and high vulnerabilities still exist within the suite of systems. A remote user could leverage most of the vulnerabilities across the network to obtain information about the system, voter ballots and results, or gain remote access to the system.
If remote access is gained, recovery of user credentials through system memory (RAM) analysis could be executed and used to modify the backend database of the EMS Server.

November 18, 2014

The Regime Is FORCING Americans To Use Rigged Machines?!

Mark Cook_CO-IT-Guy 01:17:43

Well, are you guys aware of this? Were you aware of this before today? Yes, okay, and are you continuing to sell the product? Yes, yes. Is that a yes?

Mark Cook_CO-IT-Guy 01:17:54

Yes? Go ahead, say it...

Election Source

Yes.

Mark Cook_CO-IT-Guy 01:17:56

So, you're aware of these vulnerabilities and you're continuing to sell the product? Give me a break. How can you do that to people?

Mark Cook_CO-IT-Guy 01:18:11

This is flat out evidence, so I'm going to, I'm going to continue going through the rest of my presentation. We'll talk ...

Mark Cook_CO-IT-Guy 01:18:36

Sir, you are setting a table saw in front of your child, and you're selling it to them. You're taking their money. So here I'm going to finish talking. I'm going to finish going through my presentation, and no, let me get through the rest of the presentation. Okay, I just don't want to waste people's time with This. I want to, I want to keep

01:19:02

going like think,

Mark Cook_CO-IT-Guy 01:19:29

okay, yeah, I

Mark Cook_CO-IT-Guy 01:19:34

just, I really do I want to get through the rest, because the the rest of it is really critical to you guys, and then let's have those discussions. I'll stay. I'll stay all night. I don't care. Yeah.

Mark Cook_CO-IT-Guy 01:19:59

You know, listen, they're in there.

Mark Cook_CO-IT-Guy 01:20:08

I'm going to tell you I'm getting there. And so listen, you guys, obviously, if you your business is selling this stuff, you're probably a bit biased. I get it. Okay, alright, so in November of 2014

Mark Cook_CO-IT-Guy 01:20:33

Did you hear that it's not the machines they're selling, it's the process of the elections that they're selling. That's what he said. Admitted it to everyone they are selling the election process. So who's in charge of our elections? Vendors are in charge of the elections. We are not. Our election officials are not. Are beholden to the vendors. And that is the problem.

David Clements_Prof. 01:20:57

It's not just the vendors. I mean, this is there's there's a, the lines cease to exist between intelligence agencies and the vendors.

Mark Cook_CO-IT-Guy 01:21:08

Of course. The vendors are being used by the intelligence agencies.

David Clements_Prof. 01:21:10

But, like, I don't want people to leave this, this discussion, thinking that it's this corrupt third-party vendors. These vendors were created and given agency by DHS [Dept of Homeland Security], by, you know, the Atlantic Council, you know, radical left basically set up this entire infrastructure. And what we've got is akin to a false free market, like a lot of us think, Okay, we've got competitors. You got Dominion, you got ES&S, you got Hart InterCivic. You got BPro. You got BPro. It's the same con with different packaging, right? And and this guy coming in there, whether it's Election Source or any other group, they're selling you essentially the same defective process.

Mark Cook_CO-IT-Guy 01:21:55

Yeah, yeah, they are. **And I'm glad they're finally starting to admit it.** I don't think they're going to come to any of my presentations anymore, unfortunately.

David Clements_Prof. 01:22:03

Well, it was fun to watch, Mark. All right. I think we're out of time now, Joe, you want to pray us out?

Joe Oltmann_Conservative-Daily.com 01:22:08

Yeah, well, I do, and I do want to tell you something that what you just said we at the very end Mark that is important is that they know that they are selling crap machines. **They know that they are literally out there grifting the American people in a way that literally steals their voice in the very soul of our nation and the the elected selected leaders that now have a ministerial [case?] to to rubber stamp rubber stamp an election.** That's not what the Constitution says, and that is absolutely not legal. **We're letting illegal people do illegal things to us. We're letting them basically rape and murder our children and our society and our communities.** That's what we're letting them do. And so it's going to get to the point where it gets really, really hot. It's going to get hot by November. It's gonna get really hot by November.

Mark Cook_CO-IT-Guy 01:23:04

It's not what we want. Anytime we're ready to get off that train we can do it, and we can do it together united. **I really hope all the American people decide we don't like this train ride anymore, and we want to go back to a system where the citizens truly are in control of everything in their country, and their will is accurately measured in the tools we use to measure that will, and their representatives truly do represent them and the laws they follow are actually the laws they chose to follow.**

End = (01:23:37)

#####

Background information from previous July 16, 2024 public comment regarding conversations with Leelanau County Clerk **Michelle Crocker**:

2024-07-16_Bill Wiesner @ LC-BOC Regular Meeting Handout

I. Leelanau County Vendor for Voting Equipment:

<https://www.michigan.gov/sos/elections/admin-info/voting-equipment-new/voting-equipment-vendor-contact-information>

The screenshot shows the Michigan Department of State website. The main heading is "Voting Equipment Vendor Contact Information". Below the heading, there is a navigation breadcrumb: Home > Elections > Election administrator information > Voting Equipment Vendor Contact Information. The main content area contains the following text:

For all voting equipment questions, use the following contact information.

Dominion Voting Equipment & Systems:
Please direct any questions or concerns to Election Source at: **1-888-742-8037**.

ES&S Voting Equipment & Systems
Please Direct any questions or concerns to the ES&S Michigan Call Center at: **1-877-377-8683**.

Hart Voting Equipment & Systems
Please direct any questions or concerns to Hart at: **1-866-ASK-HART (275-4278)**

Our County Clerk **Michelle Crocker** has stated several times to me that she doesn't deal with **Dominion Voting Systems**; rather, she only deals with **"Election Source"**. But see the table above to see that we in Leelanau County **or in any Dominion County in America** have only one option, which is to deal with Election Source, and they are directly connected to Dominion Voting Systems.

[BILL WIESNER CORRECTION]: ChatGPT says:

1. "Other states may have their own third-party contractors or service providers for **Dominion** machine support, but I haven't seen a statewide directive similar to Michigan's use of **Election Source.**" AND
2. "**Hart InterCivic and ES&S Direct Contact:** In most cases, if a state or jurisdiction uses Hart or ES&S equipment, the company provides direct support for election equipment, including maintenance, repairs, and questions."
