A former 2 term Republican Senator for Michigan's 7th District from 2011-2019. In 2011-2012, Colbeck led the effort to make Michigan the 24th Right-to-Work state in the United States. He was former Vice-Chair of Elections and Government Reform. He was also responsible for the passage of legislation to expand school choice and has been a vocal opponent of the Common Core Standards Initiative. He was candidate for governor in the 2018 gubernatorial race. Patrick graduated with a Masters of Science in Aerospace Engineering in 1988. In November 2020, he was a certified poll challenger at the TCF Center in Detroit, Michigan. He later appeared at the 2020 Wayne County Board of Canvassers and Michigan State Board of Canvassers Certification meetings to share his concerns of election fraud. And assisted Mike Lindell on the production of the election fraud documentary "Absolute Proof".

Patrick is a frequent guest on National TV & Radio.

Never the same talk twice...even if you've heard him before
 Come to the barn JUNE15th to hear updated information about election integrity and what WE can do about it!

Paid for with regulated funds by the Leelanau County Republican Committee. 12161 S. Coleman Rd. Empire 49630. Not authorized by any candidate committee.

@pjcolbeck

MI SoS @JocelynBenson is a serial lawbreaker yet "reporters" such as @CraigDMAuger continue to overlook her transgressions of law. MI Supreme Court supported her lawlessness by approving a stay on her update of election manuals to comply with law. #2022election was lawless.

Jocelyn Benson is a serial lawbreaker

Genetski Case

- Signature Verification Relaxation

Davis Case

- Restriction of open carry rights

Carra Case

- 6 foot separation from poll workers

Johnson Case

- Acceptance of ballots after 8pm on election day

O'Halloran Case

- Poll Challenger manual infringing rights of poll challengers

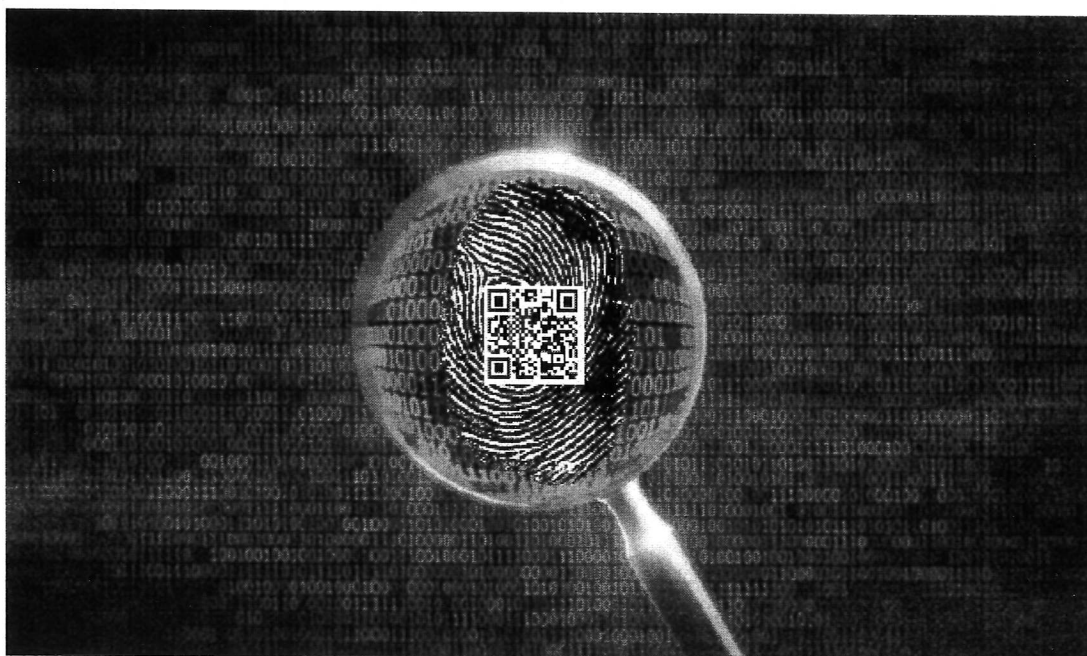

A question was raised [To Dr. Douglas G Frank]: "Can you compare your data to a state where there isn't fraud?"

Dr. Frank spent a long time trying to do that, but actually struggled to find a place there wasn't fraud, or at least struggled in knowing for sure that it was clean. He describes that by examining historic data:

1990	He could detect no fraudulent algorithm running
2008	Voter rolls massively expanded once motor vehicle registrations automatically registered voters at the same time. Around this time, the correlation coefficient between census demographics and vote demographics was around 0.5
2012	Correlation 0.7-0.8
2016	Correlation 0.9
2020	Correlation almost 0.999

THE FINGERPRINTS OF FRAUD

*EVIDENCE AND ANALYSIS OF A MULTI-STATE CONSPIRACY
TO DEFRAUD THE 2020 GENERAL ELECTION*

VOLUME ONE
