Concern that still is no Lake Level Procedure..or action

1. In January you asked for a motion to develop a procedure (passed)
2. Committee was formed
3. One page form was developed (not a procedure)
4. Repeated meetings were over-whelmed with hydraulic concerns
5. Ric Thompson submitted a sample, but no action

So.....

- I submitted a sample procedure...(took about an hour to write)
- present form that was handed out is not a procedure
- does not address who is in charge
- whom do 1000+ riparians call?
- should we have a e-mail mailbox?
- It does not address low water levels (like now)
- does not define 'time' to raise or lower
- still need a committee to write this procedure (has not met)
- should not take 1/2 year to write a good procedure
- (on file? Where is it? Is it a document?)

Lake Association was ready to write a letter, voice concerns, but held off and hopefully not make a stink. Trusting that Dam Authority will do the right things.

Phones are now ringing for two weeks!!! Why does it take 2-3 weeks past the Court Order to raise the lake level??
