

2024-03-22\_Bill Wiesner Public Comment to Leelanau County BOC Special Meeting

EIF\_www.ElectionIntegrityForce.com\_Sheriff-Dar-Leaf-"The Dominion Files"

Num	Name	Kilobytes	Pages	BW Rating (1-10)	Topics Discussed
1	1-3.PDF	252	3	7	Confidential email. Algorithm/Fractional votes/Logic&Accuracy testing/Test Decks.
2	4-6	230	3	3	Email sequence with Eric Coomer regarding use of virtual Machines (uncertified?)
3	7-9	2100	3	8	Sheree to Eric Coomer: "This is frustrating." Eric to Sheree: "We are so broken all over the place." [Confidential Emails]
4	10-11	1337	2	10	Eric Coomer re "AK-ICP modems failing acceptance testing": "What...The...Fuh..." and "We suck"
5	10-19	8072	2	-	A repeat of 10-11.PDF
6	12	787	1	7	Kay Stimson to John Poulos (Dominion President) and Eric Coomer (VP) regarding sending notice about a Safe mode system issue to local customers and not informing state offices. SOSs very angry about this. Poulos: "First I've heard of this." Coomer: "?!?!"
7	20-23	357	4	8	Eric Coomer describing how very complex the Dominion systems are if you have to merge them, as in going from "Gems" to "D-Suite" or vice versa. Plus you would have to use adjudication.
8	20-29	165	2	8	Dominion employee (Cheryl) said that Michigan asked what the system limitation is for quarantined ballots in adjudication. Answer: ~unlimited. Adds that any quarantine ballot will prevent the batch that it belongs to from moving on. This quarantine happens a lot in the August Detroit ballots with same day Precinct Delegate write-ins, since they are not on the initial list of applicants.
9	24-28	682	5	8	Dominion in Kosovo & Serbia with lots of complexity and lots of internet connectivity potential in voting.
10	31-32	765	2	?	skip -- I don't understand.
11	33-34	158	2	?	skip -- I don't understand.
12	45-53	6458	9	7	[EXTERNAL] Bug Report: full of complexity & code; email thread with Eric Coomer. [Simple and beautiful solution: verifiable paper ballots, one-day (election DAY) voting.]

Num	Name	Kilobytes	Pages	BW Rating (1-10)	Topics Discussed
13	56-57	226	2	10+	Another CONFIDENTIAL Dominion Email 3 weeks before the 2020 Presidential election, saying 10 voting machines have SQL vulnerabilities. Says if they can't be patched within the next week or so, let us know so that we can "MINIMIZE THE RISK." [From what I've heard Microsoft SQL Server is NOT on the list of verified voting machine software and can be used to easily flip votes. This is mentioned 10 times on the www.TCFamily.org website in the article named: "...Dominion is Finished TRANSCRIPTION ..."]
14	58-62	325	5	5	Dominion Email thread between October 15th and October 19th, 2020, problem solving "... The precinct counts are still off." This took place in Macomb and Wayne counties and surrounding areas in Michigan (just 3 weeks before the 2020 election).
15	93-198	27970	106	7	Lists 106 pages showing computer bugs and summaries of computer issues for Dominion voting machines around the country. [This is in contrast to what it could and should be: verifiable paper ballots hand counted by 2 Democrats with 2 Republicans with cameras rolling, in-person-voting only (except for rare exceptions) on one day -- Election Day Holiday!]

# Barry County Sheriff's Office

1212 West State Street • Hastings, Michigan 49054

*Sheriff Dar Leaf*

March 17, 2024

The Honorable Jim Jordan  
2056 Rayburn House Office Building  
Washington, DC, 20515-3504

Dear Congressman Jordan,

My office is investigating criminal acts related to elections in Barry County, the State of Michigan, and the United States. I am in possession of evidence involving voting machines. Additionally, I have recently received a subpoena from Prosecutor D.J. Hilson of Muskegon County for my file. D.J. Hilson worked with the Michigan Attorney General to bury the Muskegon fraud investigation that was initially reported by the Muskegon local clerk. Not one person was charged related to the Muskegon fraud despite confessions, and physical evidence. Considering this, I am going to provide portions of my file to Congress for immediate review and investigation.

My office has come into possession of evidence that foreign nationals have accessed electronic voting machines in Michigan and other states. This evidence demonstrates that electronic voting machines and electronic election systems used for elections in Michigan and throughout the United States are not secure and an immediate investigation is needed by Congress.

I have evidence in my file of Serbian foreign nationals entering our election system while the votes were being counted, and prior to certification. The election vendor, Dominion, hired these Serbian employees and disclosed in emails that they are not able to provide backgrounds on these individuals due to law in Serbia. It has only been a mere 25 years since conflict involving Serbia. Therefore, the United States has allowed a scenario where potentially Serbian military criminals are running our elections and remotely entering our election equipment.

I am investigating the role that some individuals inside the United States have played in conspiring with these foreign nationals, and who have even directed and instructed them to access and interfere with electronic voting machines and electronic voting systems during past elections, including the November 2020 election. Multiple false assurances from state and federal agencies, and private companies that our elections were secure and not compromised through remote network access or otherwise. Moreover, I have evidence that U.S. Dominion and its affiliates (Dominion) instructed its employees to alter or otherwise falsify the integrity of the software and hardware in its voting machines and systems to attain certification by the Election Assistance Commission (EAC), even when they knew that the systems could not be properly verified and certified. Additionally, I have evidence that the voting machines and systems are vulnerable to alteration and manipulation, i.e., interference, by the use of thumb drives and external devices that

can be surreptitiously connected to voting machines before, during, and after elections.

As a result of this information, my office is also investigating conspiracy crimes, wire services fraud, honest services fraud, and perjury charges, among other criminal acts. The perjury charges stem from assurances by Dominion's CEO during sworn testimony before the Michigan Legislature that its voting machines and voting systems could not be accessed or connected to by outside networks and sources, and that it was a "US based company."

As I now have evidence that our election equipment is not secure and because election voting machines prevent transparency, and vendors have more oversight and authority to have them examined than the officials that are charged with the constitutional duty to insure our elections are secure, transparent, and fulfill our promise to each and every American that their votes will count, and will be properly tabulated, and not diluted, deleted or otherwise altered, I am presenting you with this letter and an initial tranche of this evidence so that you will review it, and be compelled to investigate this matter and call those responsible for this breach of our Constitution to give testimony concerning these criminal acts and breach of our national security. These matters impact not only us here in the State of Michigan, but every citizen voter in the country who relies on the Constitution's promise that each legal registered citizen voter should have one vote, and that vote should correctly reflect his or her will and choice.

As a constitutional officer, my duties are defined by my oath of office, the Constitution, the statutes governing my office, and those powers at common law that were recognized as being attached to my position. In light of this evidence, I am suggesting that every election official consider an emergency back-up plan for upcoming elections to prepare to verify all ballots and voters, and to hand count actual paper ballots at the end of elections to confirm the accuracy of the vote, the voters, and that our election machines are working properly. There is no harm in confirming results to ensure that the will of the people is reflected.

Thank you, in advance, for your prompt attention to this matter. Please do not hesitate to contact me if you have any questions or would like additional information concerning my investigation. As it stands, I have no faith in the federal institutions that allowed this garbage in the first place therefore, I am attaching unredacted documents for your review. More importantly, for review by the American people. This should allow for Congress to issue subpoenas in an expedited fashion. I look forward to Congress working for the American people, and quickly addressing these election security problems while I pursue the criminal investigation with sheriffs across the country.

Sincerely,

*/s/ Dar Leaf*

Barry County Sheriff Dar Leaf
