[Excerpts Only - Regarding how Texas was saved in the 2020 Election (Unedited transcription)]

...

Tucker Carlson_Reporter 30:16

Of course and whether voters have the power to send their choice into office. I mean, the voters have powers that and

Ken Paxton_TX-AG 30:26

if you think about it, if we lose the state, the laws are going to change. All the voter laws are going to change. We'll be like California where you can just mail in ballots. What I know from Ella Bella having fought this for the last election winning 12 cases on million ballots that unfortunately other states like Georgia did not fight. I know that mailing ballots are completely unreliable if you just mail them out to everybody. You have no idea who sent it back. There's no verification and when they say you can't prove voter fraud, they are right because normally what you have to do if you're gonna mail in ballot, you have to satisfy the laws under certain categories. You're over 65 You're out of state what you're disabled. You satisfy you sign an affidavit and you send it in with your application. This is my signature and then when you send your ballot I send you a ballot and an envelope, you sign that envelope with your safety stick about it and they verify the signatures not the best not as good as photo ID that we have are all everybody. But it still is something but when you change it to mailing it out to everybody. We have no idea we have no signature verification. We have no idea who's voting. So when they say you can't prove voter fraud, that's the system that they like because we can't prove voter fraud. If we set up a system it's completely open. And that's what's happening in America. So

Tucker Carlson_Reporter 31:31

that's why Georgia which most of us thought was a kind of conservative state became one of the most left wing states in the country. You believe because of mailing ballots. I

Ken Paxton_TX-AG 31:39

sat there on election night. I told I told the President in I think it was May I said Mr. President, I have 12 lawsuits in the most liberal counties I'm losing in every county because they sued and liberal counties where all the judges are liberal court of appeals are liberal. I'm gonna have to find a way to get the Supreme Court of the Fifth Circuit before it's too late for the Millers. belta Or you won't win Texas I guarantee if harris county could send out 2.7 million ballots. You won Texas by 600,000. You will not win. And if if we have multiple counties

doing that, they'll they'll just figure out how many votes they need. We won every single lawsuit every all 12 And I told them we lose one you're done. He didn't believe me. I said you've got to watch this in other states because if this is happening in Texas, which it looks like it's a it's a national program. I can only focus on Texas, you better make sure this doesn't happen in other states. And sure enough, Georgia, which had the same margin of victory for Trump for years prior. They don't stop it. The governor the AG, they just let they sign a consent decree and they have mail and bells and dosage verification. They have drop off boxes, and they love all these mail in ballots. And guess what now Georgia that had the same margin of victory for Trump. Now suddenly we have an eight or 9% win for Trump by protecting the ballot box in Georgia. He loses by what 14,000 I don't know what it was a small amount. And I knew when they stopped counting votes the on election I'm sitting there watching going, this is what they would have done in Texas, and all that what was that about? What's that?

Tucker Carlson_Reporter 33:06

They stopped counting votes on election because what they needed

Ken Paxton_TX-AG 33:09

to figure out was how many real votes there were so they could figure out how many million ballots to apply to the election. That's what they would have done in Texas, I'm convinced so you think that was fraud? Right? I have no doubt having been through that whole thing wasn't just a water leak. Who was definitely planned? I mean, it would have happened in Texas,

Tucker Carlson_Reporter 33:26

I promise. Can you just stop counting ballots on election night whenever we didn't watching T ri No. Have you

Ken Paxton_TX-AG 33:31

ever seen that before ever? For three you told me I've never seen it before in my life. I was like, I knew when they stopped and it was and Trump is leading in all these states. I knew exactly what they're there because there's no way to know where those mailing bells can anybody could have filled them out anybody. There's no way to know where those belts came from.

Tucker Carlson_Reporter 33:51

That's that's not a dangerous conspiracy theory. It's,

Ken Paxton_TX-AG 33:55

I watched it happen. I was a part of it. So they tell me I'm crazy. Whenever I talk about they tell me that I should shut up and perfect. They're going after my state bar license right now for going after election fraud and the overall election. So on top of all of this, you know, I've got to deal with the
