That very, very limited, and then we pay for computers and computer time and stuff, because we've even analyzed hundreds of millions of records. I mean hundreds of millions. What we found is just horrendous. I mean the and again, **remember coy. Coy says failure to attend to the law makes you guilty of of intent because you are responsible for attending to the law or following the law. So an election fraud. These are millions of cases of election fraud provable under the DOJ own published guidelines. We're not inventing a legal theory here. We're not having to go out on out on a limb. If you read the you know, DOJ guidance material and the prosecution of election offenses, it spells out what the crime of election fraud is, what it means, and it also defines that these people are committing it at scale. So what we've measured or millions and millions of cases of election fraud, million ...**

#####

It is clear they were resetting both the Democrat and Republican votes on Proposition B in Arapahoe in great some study statewide there was significant difference between their changes over time (derivative of the curves), not any constant partisan difference in how Republicans and Democrats voted.

Check at about the 30 minute mark:

Every County in Colorado in the 2020 election had the pattern on the left, EXCEPT Arapaho County – see the pattern on the right, when voting on Proposition B, which was to increase taxes.

This ABSOLUTELY shows computer manipulation.
