Dear Commissioners,
My husband and I are very excited about the possibility for a grant for Solar Panels at the Government Center.

It will be so nice to see our tax dollars coming home to support alternative energy in our beautiful county.

It would be a point of pride for our county to be known as a leader in utilizing alternative energy and placing our rural community on a firm energy footing for the future.

It would also support the Native American Seventh Generation Principle. The Seven Generations Principle is based on an ancient philosophy stating that the decisions we make today should result in a sustainable world seven generations into the future.

Thank you for supporting the application for the grant.
Respectfully,
Pierce and Dana Getsinger
