Subject: Yes to Solar Energy!

Dear Leelanau Commissioners,

I strongly urge the Board of Commissioners to move forward in adopting solar energy at the Leelanau County Government Center - especially if the county has the good fortune of receiving a state grant to cover the cost. My husband and I installed solar panels 5 years ago at our home in Glen Arbor Township and are extremely happy with their performance. Despite Northern Michigan's short and often cloudy winter days, the solar panels produce a vast majority of our electricity needs each year and are proving to be a solid investment. Adopting solar energy is a common sense move which makes economic and environmental sense. It is a win-win.

I thank you all for your service to our community and sincerely hope you can approach this issue with an open mind. The potential for an upside when it comes to adopting solar energy is tremendous.

Sincerely,
Jean Jenkins
