Greetings Commissioners

As always, thanks so much for your work on the Commission; it's been a trying period- thank you each for continuing to work in service to our County.

I understand an interesting solar project is afoot there at the Governmental Center. As a long time enthusiast of solar power (I raised my children fully dependent on solar and wind power as we lived off the grid in Leland Township and now, in Empire, we enjoy the benefits of roof panels), I heartily support the project and hope that you will too.

Solar panels have no moving parts, little to maintain once installed and are often hidden from view (although there are no eye sore compared to many power producing systems). You no doubt have plenty of facts at your disposal, so I will not go on at length.

thank you for considering this important matter,

Maggie Sprattmoran
