Subject: I support the Solar Power Grant Application
Date: Monday, February 19, 2024 8:53:27 PM

To Clerk Staff:

Please forward this message to all our commissioners.

I know that Renewable energy like Solar power is the King of all clean renewable energy sources. The cost of solar has dropped 80 % in the last few years. The cost of solar energy is now even with fossil fuel for energy. So why would anyone choose Natural gas, coal or oil?

We need to stop burning fossil fuel as an energy as much as possible. possible. Burning Fossil fuel is the root cause of our climate Crisis. We've mucked up the atmosphere enough. Do the right thing for yourself, for your kids and grandkids. All elected officials are responsible for keeping our environment safe not destroying our environment. Also all commissioners are responsible for Lealanau's air, water and soil; you as an elected official agreed to protect our natural resources.

Thank you!
