

**The following read from notes prepared during meeting and some from notes prepared earlier, at Second Public Comment period at end of this meeting.**

We need help to understand commissions policy change tonight limiting Public Comment at Commission meetings. Need clarification public comment eliminated/limited at which BOC meetings. Wessel clarified: "1<sup>st</sup> public comment-Exec. Meeting limited to agenda items **only**.

All other meetings public comment on any matter(s)."

Do commissioners have a report for a 3 – 5 year period indicating the many hours of waste their 'precious' time? Or, violations the of public causing need/necessity for this change? Commissioners this year have wasted an hour on this issue trying fix something that's not/was **not broken**. Appears commissioners like the **Clerk-Loathing** action of May 11, 2021 made a NON fact-based decision to now cancel the public. Apparently and 'honorable' thing to do? Appears commissioners are trying to find 'monsters/enemies' to destroy among people making public comment. **We request this board rescind its motion re public comment tonight, before this meeting ends...**

Our County Commissioner (Ross) witnessed **GOVERNMENT by INSANITY** last nite 8/15/23 at the **Leland Twp Board** meeting showing questionable/bad decision making—a unilateral tax increase without electors approval, etc. Electors/voters left out of the tax increase process by unilaterally imposing a **ONE (1) %** "administrative" fee. Seems obvious the **Board** can't manage Taxpayers money. How has the township survived for more than 100 years without an administrative fee? We advised the **Board** that such poor performance requires an new slate of candidates for the next election... We trust that our commissioner (ROSS) communicates last nite's **bad** government performance to her colleagues and Administrator.

The past two commissions appear to have poor leadership in one area. Recently we advised **this BOC** they **ALL may be unfit** for office for next election due to BOC's proceeding with the **terrible/ tragic impact** of the prior BOC's May 21, 2021 **Clerk-Loathing** decision (immediately removing all duties associated with Finance and Human Resources) causing a financial crises (**recently criticized by Auditor Peacock**) with collaboration from **two other elected officials**. Sadly, we've had poor leadership from this BOC on **this matter**, particularly the Chair, which should have stopped the Clerk-Loathing process on Jan. 1, 2022. Instead, we mostly have sheeple—seeming no conscience leadership on this issue, accomplished with seeming behind the scenes manipulations to continue the waste of nearly a \$million to this point....

As requested before, we trust some commissioner(s) & BOC has courage to be held accountability **by their fiduciary duty/obligation** regarding **BOC's May 11, 2021 Clerk-Loathing** decision as follows:

**We again respectfully request this BOC to take action immediately to prepare a report to taxpayers on the wasted taxpayers money (\$500,000+) and harm and damage done to people in this building and ongoing, caused by the BOC's May 11, 2021 damaging Clerk-Loathing decision. This BOC must accept the truth about its continuing costly/ harmful support of the prior BOC's decision. Please take action immediately as waiting for next election cycle may be difficult for most/all of you to run and for office...**
