Greetings,

Generally I am inclined to think that taxes are the (reasonable) price we pay for civilization. However I am having doubts about the proposed Timberlee Drain assessment.

Here's what is bothering me.

- My wanderings in the vicinity of my home have not revealed anything that appears to be a drainage issue.
- Visiting the County website did not reveal anything relating to the Sept. 9 petition or anything else that revealed the location of, and need for, drainage.

Therefore, at this point, I strongly disagree with this drainage proposal.

Thank you,
Bruce Knott
