Commissioner,

My wife and I are residents of Timberlee Hills (10601 Snowcrest Ct) and find your letter lacking in sufficient specifics to be of much use. It would have been helpful to post the actual petition online for our review. Lacking specifics we are now left with neighborhood rumors. Neighbors who have called your office present that this isn't primarily a drainage project but rather a desire to pave the dirt road leading out of the back side of this subdivision. IF that is the case we see no need for it. For a large part of the last last year the owner of this land had a tree blocking passage so it couldn't be used. There are no houses directly on this dirt road so few if any would actually derive any benefit. As to drainage this dirt road sits up on the hill a fair amount and has never had standing water that we are aware of.

Thank you for accepting our input,

Hal and Kelly LaLonde
