LAKE LEELANAU WATER LEVEL CONTROL PROCEDURE

The Leelanau County Dam Board has the responsibility to oversee the maintenance and operation of the dam system to control the water level as set by the Court Order File No. 78-610-2-P2.

A specific County employee shall be assigned responsibility to monitor the Lake level daily.

The dam gate shall be adjusted as needed to maintain the water level to comply with the Court Order: 589.21 feet above mean sea level plus zero, minus 2 inches from April 15th to November 15th.

During significant weather events the water level at the dam shall be adjusted near the low end of the 2 inch range to allow for anticipated increased future flow. (Refer to the Dam Procedure Document)
